**Subject:** Re: Fw: RTKL Demand For Documents For Heavenly Angels And DePue Farm Water Contamination !

Dennis- Restaurants and schools are only water systems if they have their own wells. I alerted the program manger for DEP (Lisa Daniels) about the complaint. She had not heard anything about it from the field office... She is now alerted and got back to me with the status. previous message. I had a previous meeting with both Lisa and Scott Perry and tried to make sure they communicate between thier staffs when a drinking water system may be affected by oil and gas activity. we raised this when we had a restaurant south of Dimock that was temporarily impacted by "muddy water" after some drilling started next door last year...in that case the water program had not been notified that the oil company was providing bottled water, which must be reported! so trying to get the two offices to talk....

Karen D. Johnson, Chief  
Ground Water & Enforcement Branch
